

Explainable HR Shortlist Report

Generated on May 10, 2026 at 15:29 · Human review is required before any hiring decision

Job Requirements

Role	Senior AI Engineer
Domain	HR Shortlisting Automation
Seniority	Senior
Must-have skills	Python, ML systems, LLM applications, LangChain, LangGraph, Prompt engineering, Structured output validation, SQL, pandas, API design
Nice-to-have	HR analytics, Recruiting workflows, Talent acquisition data
Min. experience	5 years
Education	Bachelor's degree in Computer Science, Bachelor's degree in Data Science, Bachelor's degree in Engineering
Certifications	Cloud certifications, ML certifications

Ranked Candidates

1	Isha Raman	10.0/10	HIRE	10.0/10	10.0/10	10.0/10	10.0/10	10.0/10
2	Rahul Mehta	8.0/10	HIRE	7.0/10	9.0/10	6.0/10	9.0/10	9.0/10
3	Vikram Sethi	1.6/10	NO HIRE	0.0/10	0.0/10	5.0/10	0.0/10	9.0/10

1. Isha Raman

Total: 10.0/10 · Recommendation: **HIRE** · Confidence: 100%

Skills Match	30%	10.0/10	3.00	The candidate possesses all required must-have and nice-to-have skills, demonstrating a comprehensive technical and domain-specific fit. Evidence: Python, SQL, pandas, LLM
Experience Relevance	25%	10.0/10	2.50	The candidate's 9.5 years of experience, current Senior AI Engineer role, and direct involvement in HR shortlisting automation projects perfectly align with the required seniority and domain. Evidence: total_years_experience: 9.5, current_title: Senior AI Engineer, domains: ["HR", "Recruiting", "AI", "Machine Learning", "NLP", "HR Analytics"], Explainable Shortlisting System
Education & Certs	15%	10.0/10	1.50	The candidate holds a relevant B.Tech in Computer Science from a top institution and possesses two highly relevant certifications, including AWS ML Specialty. Evidence: B.Tech in Computer Science and Engineering, Indian Institute of Technology, Madras (2016), AWS Machine Learning Specialty (2023), DeepLearning.AI LangChain for LLM Application Development (2024)
Project / Portfolio	20%	10.0/10	2.00	The candidate presents a strong portfolio of three highly relevant projects that directly address the core responsibilities of the role, demonstrating practical application of required skills. Evidence: Explainable Shortlisting System, Recruiter Dashboard, Resume Parser Service
Communication Quality	10%	10.0/10	1.00	The candidate's profile text is exceptionally well-structured, clear, and impactful, effectively communicating their expertise and achievements with excellent grammar and conciseness. Evidence: headline: Senior AI Engineer LangGraph & HR Analytics, summary: Passionate AI engineer with 9 years of experience building production-grade ML systems and LLM-powered applications for the HR and recruiting domain. I specialise in designing transparent, auditable AI workflows..., Improved recruiter review throughput by 42% and reduced time-to-shortlist from 3 days to 4 hours.

Strengths: Deep expertise in LLM applications, LangChain, and LangGraph. · Extensive experience in HR and recruiting domain-specific AI solutions. · Strong portfolio of highly relevant projects directly addressing job responsibilities. · Proven ability to build explainable, auditable, and production-grade ML systems. · Demonstrated commitment to PII safety and bias mitigation in AI.

Isha Raman is an exceptional candidate who perfectly aligns with all requirements for the Senior AI Engineer role. Her extensive experience, specialized skills in LLM applications and HR analytics, and a strong portfolio of directly relevant projects demonstrate a superior fit. She exceeds seniority requirements, holds relevant education and certifications, and communicates her expertise clearly and effectively.

2. Rahul Mehta

Total: 8.0/10 · Recommendation: HIRE · Confidence: 90%

Skills Match	30%	7.0/10	2.10	Rahul demonstrates strong proficiency in core ML/LLM skills like Python, LangChain, RAG, prompt engineering, and data analysis, but lacks explicit experience with LangGraph, Streamlit, FastAPI, and structured output validation. Evidence: Python, SQL, pandas, LangChain
Experience Relevance	25%	9.0/10	2.25	With 5.5 years of experience as an ML Engineer and direct exposure to HR analytics and job data processing, Rahul's background is highly relevant to the domain and seniority requirements. Evidence: total_years_experience: 5.5, current_title: ML Engineer, domains: HR Analytics, experience_description: Analysed job posting and applicant data using SQL and pandas. Built automated reporting dashboards for recruitment metrics. Exposed to HR analytics workflows and ATS integrations.
Education & Certs	15%	6.0/10	0.90	Rahul holds an M.Sc. in Data Science, exceeding the minimum education requirement, but does not list any relevant cloud or ML certifications. Evidence: M.Sc. in Data Science, Pune University (2020)
Project / Portfolio	20%	9.0/10	1.80	His 'Customer Support Bot' project demonstrates strong LLM application development with measurable impact, and the 'Job Market Trends Dashboard' is directly relevant to the HR domain. Evidence: Customer Support Bot: End-to-end chatbot with LangChain, retrieval-augmented generation, and escalation logic. Reduced ticket resolution time by 35%., Job Market Trends Dashboard: Interactive Plotly dashboard analysing 50K+ job postings scraped from Naukri.com.
Communication Quality	10%	9.0/10	0.90	The provided profile text is clear, well-structured, and effectively highlights key skills, experience, and achievements. Evidence: raw_text_excerpt

Strengths: Strong experience in LLM application development, RAG, and prompt engineering. · Direct experience in HR analytics and processing job market data, providing excellent domain fit. · Demonstrated ability to build end-to-end AI solutions with measurable impact through relevant projects. · Solid technical skills in Python, LangChain, SQL, pandas, AWS, and Docker. · Relevant academic background with an M.Sc. in Data Science.

Gaps: Lack of explicit experience with specific frameworks like LangGraph, Streamlit, and FastAPI. · No direct evidence of experience with structured output validation or advanced API design. · No explicit mention of experience in explaining technical tradeoffs to non-technical stakeholders. · Absence of cloud or ML certifications.

Rahul demonstrates strong technical proficiency in LLM application development, RAG, and prompt engineering, directly aligning with core responsibilities. His experience in HR analytics and processing job market data provides an excellent domain fit. While some specific framework experience and certifications are missing, his relevant projects and overall experience make him a highly suitable candidate for the Senior AI Engineer role.

3. Vikram Sethi

Total: **1.6/10** · Recommendation: **NO HIRE** · Confidence: 100%

Skills Match	30%	0.0/10	0.00	The candidate's skills are predominantly in frontend development (React, TypeScript) with no evidence of the required AI/ML, Python, LLM, or data engineering skills. <i>Evidence: skills: JavaScript, TypeScript, React, Next.js, HTML, CSS, TailwindCSS, Git, REST APIs, Figma, Recharts, React Hook Form, summary: Limited exposure to backend or ML workflows.</i>
Experience Relevance	25%	0.0/10	0.00	The candidate's 3.25 years of frontend development experience does not meet the 5 years required for a Senior AI Engineer role, and the domain is entirely unrelated. <i>Evidence: total_years_experience: 3.25, current_title: Frontend Developer, domains: Frontend Development, Web Development, UI/UX, SaaS, requirements.min_years_experience: 5.0</i>
Education & Certs	15%	5.0/10	0.75	The candidate holds a BCA degree which meets the minimum educational requirement, but their certification is for frontend development rather than AI/ML or cloud. <i>Evidence: education: BCA (Bachelor of Computer Applications), Amity University, Noida (2022), certifications: Meta Frontend Developer Professional Certificate (2023), requirements.education: Bachelor's degree in Computer Science, Data Science, Engineering, Equivalent practical experience, requirements.certifications: Cloud certifications, ML certifications</i>
Project / Portfolio	20%	0.0/10	0.00	The candidate's projects are exclusively focused on frontend web development and do not demonstrate any experience with AI, ML, or LLM applications. <i>Evidence: projects: SaaS Analytics Dashboard: Built a multi-tenant dashboard with React, TypeScript, and Recharts for data visualisation. Implemented role-based access control on the frontend., projects: Portfolio Website: Personal portfolio built with Next.js and deployed on Vercel.</i>
Communication Quality	10%	9.0/10	0.90	The raw text excerpt is well-structured, clear, and uses professional language to effectively communicate the candidate's experience and skills. <i>Evidence: raw_text_excerpt</i>

Strengths: Strong frontend development skills (React, TypeScript, Next.js) · Experience in building and maintaining SaaS dashboards · Good communication quality as evidenced by the profile text

Gaps: Lack of essential AI/ML/LLM skills (e.g., Python, LangChain, RAG, Prompt engineering) · Insufficient total years of experience for a Senior role (3.25 years vs 5+ required) · No relevant experience or projects in AI/ML or the HR Shortlisting Automation domain · Certifications are not relevant to AI/ML or cloud technologies

The candidate is a proficient frontend developer with strong communication skills but lacks the fundamental AI/ML engineering skills, relevant experience, and seniority required for a Senior AI Engineer role, as explicitly stated in their profile summary regarding limited exposure to ML workflows.
